No war in the Middle East

Bring the troops home now

Money for human needs, not war

WAR IS NOT THE ANSWER. At \$70 million each day, the massive US military buildup makes a devastating war more likely. With the military technology available, including nuclear weapons, war will bring thousands of deaths, untold suffering and longterm economic disaster to people worldwide. Billions of dollars which should go into housing, AIDS, education, alternative energy and cleaning up the environment are being poured into military spending. Racism against Arabs, African Americans and all people of color as well as anti-semitism are on the rise. The high numbers of African Americans and Latinos serving in the Persian Gulf means these communities carry an especially large burden for a war most Americans don't want. We oppose military occupations and interventions. We call for the peaceful resolution of the Gulf crisis and an international conference to resolve all of the conflicts in the region. **LET'S STOP THIS WAR BEFORE IT STARTS.**

National Campaign for Peace in the Middle East 104 Fulton St. Rm 303, NY, NY 10038 212 227 0221. Local
