

Defend Democracy!

Stand up against right-wing terrorism!

In support of democracy cut
this out and display it on
bulletin boards, car windows
- wherever it can be seen.

The armed assault and occupation of the World Trade Centre is an outrageous and violent attack on the very principles of democracy.

The government's refusal to act on prior warnings, their lack of response during the attack and their reluctance to arrest the leaders, is nothing less than their failure to defend the rights of every peace loving South African.

We demand:

- Finalisation of the election date.
- Installation of the TEC.
- Multi-party control of the security forces.
- The arrest and prosecution of those involved in the assault.
- The resignation of Minister Hernus Kriel.

Our call to all South Africans:

We call on all South Africans without exception - including all workers, representatives and leaders of business, religious bodies and

civil societies - to take action in whatever form possible. Organise peaceful demonstrations, rallies and marches. Arrange pickets and petitions. Do whatever is appropriate to your situation and region.

But do something. Your future is at stake.

Use your democratic right to voice your opinion against those who would like to silence it.

NOW IS THE TIME FOR TRUE DEMOCRACY

Make July 1 a day of national action in defence of democracy and negotiation.
