

my family

My family is a big family is my mother father; my sister; my brother and my younger brother. I like my family because my family go to church every day and my father does not like to go to church because he don't have a time to go to church because he is a taxi driver. Another thing I like my mother because she cook for us everyday and she wash a washing for us and when we are going to open school she clean for us -

The is no
noughing that I dont like
in my family. They always do
write things.

South Africa today

Today I'm going to talk about [South Africa today].
South Africa is in Africa. In South Africa we have
many different people like white, black, ...

Here in South Africa we were suffering for one thing freedom. White (Boer) were killing us, killing us for telling truth. Our parents were suffering for school, food and cloth and in South Africa I don't like Bantu education because Bantu education don't give's us good explaining. I think South Africa is changing. It is really changing and we now can see our leaders. Bantu education is now going to be eliminated back in our school, our teacher don't teach us to understand they just gives us home work and go to drink tea. Our leaders are being ~~replaced~~ and I think at school we are going to have more classroom because in my class we are 78.

I think South Africa Today is going to be good because I see some changes of South Africa

What are rights

Our walls are cracked
And our roofs are leaking
Our parents work late

When rights are all we are seeking

Our schools are shattered
and our houses are being destroyed
We don't have a place to live
Our sisters and brothers have been killed
Our brothers are unemployed

What are rights?

Do we have any?
What can we do
If we - don't have a penny?

CHALK DOWN

This is the deeds of apartheid in South Africa. I keep asking myself why the whites don't strike the answer is obvious. Then the native teacher termed as black teachers are on strike.

They termed it Chalkdown which in other words they won't teach and you know the consequences of that. DET don't want to increase their salaries.

Teachers are on strike because their earning nuts but ^{they} are working like slaves. At the other side their straining the students. Just look think about 1989 results who did it strike the parents.

Then let us look at the standard nine down words do you think that they will be matured for Matri.

I am very worried about the situation in Soweto schools. When teachers are on strike the students start thinking of satanic ideas. They won't study they will only open their books in front of a teacher only. So I think DET must pay attention to what the teachers are crying for. Firstly as the bible said, that ask and you will be given but the DET ignored the pleading of teachers. What should the teachers do to make themselves heard by the department of Empty Tins.

Youth Delinquency

At our schools we have not toilets, our classrooms have not windows, ceilings and even doors. On mondays when we come to school we find waste product on top of our desk. Our classrooms are dirty we have no brooms for sweeping. Sometimes the week end without having water so we cant scrub the floor.

There are many gangsters at school. When the teacher come to class, they told the teacher to go outside because they are tired. They told him/her to come tomorrow. They come to school with stolen cars and twist them after twisting then they burn those cars in the school yard. From then they go to the tennis court and play dices. Many gangsters usually come with their friends at school and take the girls away from school and rape them.

I think the best thing to stop all this nonsense, is to form an organisation and take some actions.

English
name: Abby Mkhabela 18 yrs
topic: The changing role of women.

Men and women are different because a woman can give birth and a man can't. Women are basically meant to be house wives and look after their children while men sweat at their jobs. Men are basically meant to work and support their wives and children.

Men and women differ physically but mentally they do not. These days you find that women are working with their men. They look for someone who will look after their children when they are at work. You often find women doing jobs which were previously only done by men. The reason for both the men and women having to work is because of the high cost of living.

With inflation getting higher most men can't afford to support a home alone. His wife must help him so that they can also provide more for their future and for the future of their children.

"HOME SWEET HOME"

ELIZABETH N. MOTLWU
19 yrs

We have housing problems. Many people here in South Africa do not have places to sleep or homes. That is why one often finds twenty people living in a two roomed house. Some live in shacks, and when it rains they collapse.

There is a place right in Soweto called Mshenqville. That place is very unsafe, because they built the shacks on a low ground near water. When it rained some shacks collapsed. Many children died playing in that dirty water. They did not even have toilets. They were then given a safe place on Orange Farm because Mshenqville was unsafe.

Many of our parents do not have their own houses. There are many construction companies that are building houses. It is not always possible to buy them because they are very expensive. Our parents do not have enough money to buy them, because they earn peanuts.

Street children

They are here, in Hillbrow
Street children

Poor and no homes to go
to. If it is food they need
They go to shops

Wait and wait until people
leave something for them
If it is ~~food~~ money, they
shine people's shoes

They sleep in dust bin
in pipes and every where
They steal people things
because they are poor

Future South Africa

The future of S.A depends on the reshaping of the system, and demolishing the laws of racism. Job reservation must be uplifted to improve the standard of income to the country. Natural resources must be exposed to balance the economy of the country.

Nationalisation must be put into process to distribute wealth equally. People should work together to build and preserve the future of our land. Technology in schools is one of the vital things which must be emphasized in all standard from early stage to tertiary institutions.

Racial conflict

Here in South Africa there is racial conflict between whites and blacks especially the boers. For an example A.W.P. kills black peoples. Since Dr Mandela was released from jail the boers became wild and killed black peoples especially in Pretoria area. Boers hate blacks and they call them dogs and they think blacks are not important. Most of blacks don't like boers because boers treat blacks like slaves in work.

In the townships the poor policemen shoot people like dogs. I think this Racial conflict must come to an end. We must be united and build a new South Africa because we are human beings we look the same there is no difference between blacks and whites. And we must respect each other and there must be peace in South Africa.

Pollution

Pollution sometimes is good other times is not good, is "BAD".

WHY I say Pollution is good - Sometimes you will have find the dog taking out the waste the it (dog) is going to fertilized the land with that waste products, and if you plant the vegetables your vegetables is going to be big and fresh.

Why I say Pollution is bad - e.g. Air Pollution, and sometimes you will have find the person is splitting the sputum "Sekgophlolo" at the ground and that sputum is going to change to the soil then there comes the dust and the person pass at that place busy talking then that dust goes through to his/her nostrils goes to the lungs then TB starts there with pollution of land.

Assignment
S.A. in '90'

In South Africa there are promising changes. Organisations have been unbanned, like P.A.C., A.N.C., M.O.M and many others. A.N.C leader Dr. Nelson Mandela has been released and many other organisation leaders has been released. Negotiations are held but only one or more things that embarrassed is that the government and D.E.T. wasting ^{one} for the black education and delay to meet the demands of teacher who are in strike; Although the government made changes they have not yet finished because still jail are full of political prisoners and people whom were born in S.A. are still in exile. I will like to encourage political leaders to sit on the S.A. government on the neck, so that they could bring back our rights and to have all opportunity we don't have.

THE OPEN SCHOOL
CHILDREN'S ART
CALENDAR

1991

The drawings for the calendar were done by the children of the Open School and are based on the thematic approach applied in all workshops, where children critically analyse and examine issues affecting their lives.

They express their perceptions and feelings through the mediums of Art, Drama and Dance.
